

How to Install & Register Cycad Process®

Current Cycad Process® version 2016.01

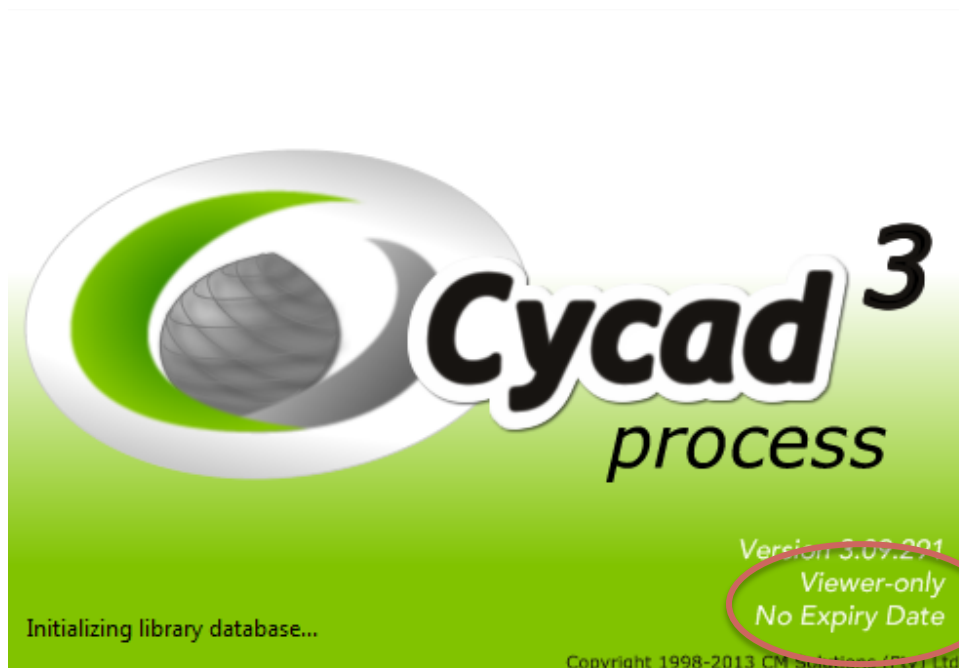

1a. Download the Cycad Process® install. If the install is zipped then you must first unzip it to a temporary folder (e.g. your desktop). [Note: should you be asked, the password is “**cmsolutions**”].

1b. If you are using a dongle then you must first install the dongle (available from same source as install). The installation of the dongle requires administrator rights on the machine.

2. Once unzipped, run the Cycad Process® install. This will install Cycad Process® into a user-folder on your machine.

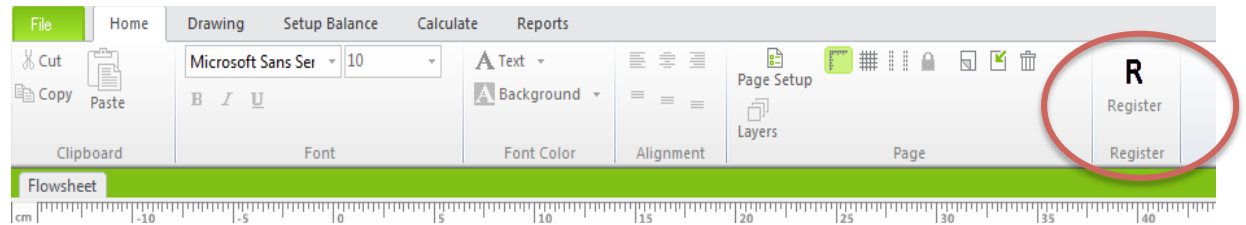

**Should you specifically wish to install Cycad Process® into your “Program Files” folder you must run the install as administrator. This is done by right-clicking on the install and selecting “Run as Administrator”.*

3. Load Cycad Process®. During the loading you may notice that the splash screen indicates that Cycad Process® is loading in “Viewer-only” mode. Without registering Cycad Process®, all you can do is view and print your Cycad Process® files.

4a. During the load, if your copy of Cycad Process® is not registered (you require a key even if you are using the dongle). Select “yes” to go directly to the registration page. If you select “yes”, continue from step 5.

4b. If you selected “no” during start up, you can still access the registration pages. Once Cycad Process® has loaded select the “R” – register

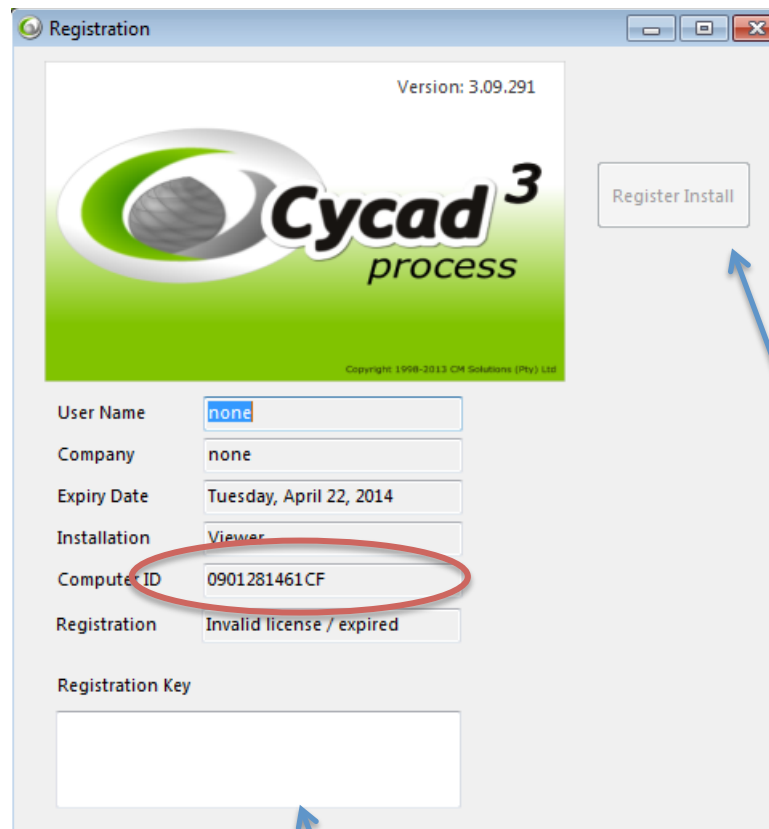

5a. If you have a registration key, paste the key into the registration textbox (see below).

5b. If you do not have a registration key then copy your computer ID (see below) and email it to CM Solutions at the following address:

cycadprocess@cm-solutions.co.za

In addition to the computer ID.

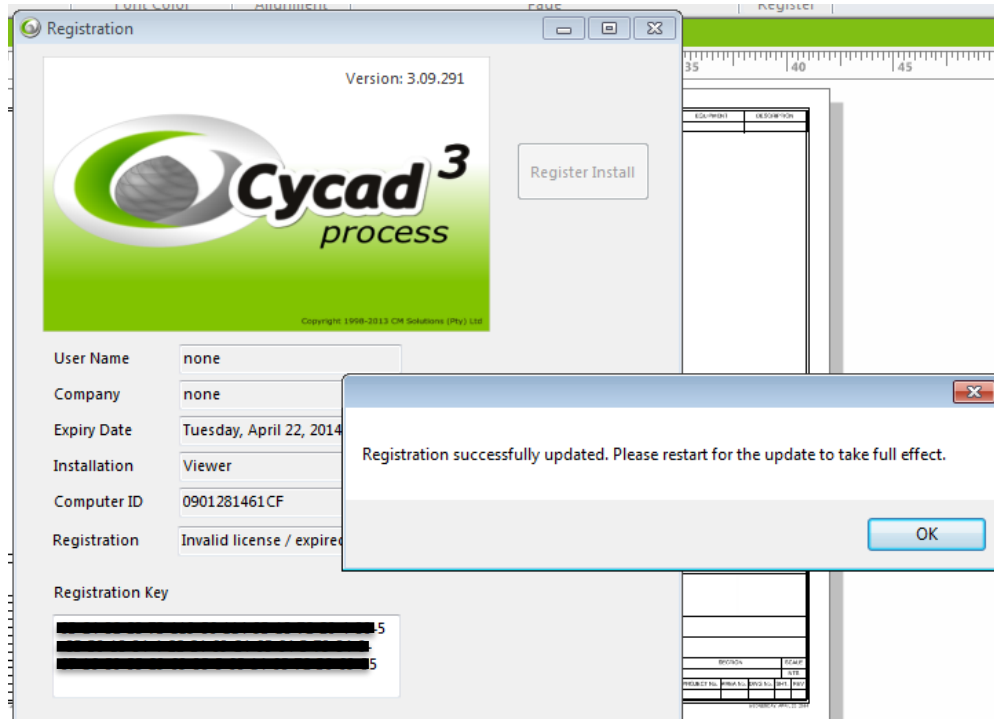

6. CM Solutions will email back a registration key that will look something similar to the following:

63-24-82-31-24-56-12-45-133-...

Copy this registration key into the registration key text box and select "Register Install".

7. After a few moments you should get a message saying, "Registration successfully updated." Click "OK".

8. Restart Cycad Process®. Your copy of Cycad Process® is now registered.
